

International Workshop on

Sampling Methodologies for Monitoring Sustainable Development Goal Indicators

**Organized by the Institute of Statistical Research and Training (ISRT),
University of Dhaka, Bangladesh**

17-19 December 2019

ISRT, University of Dhaka, Dhaka, Bangladesh

Objectives: The workshop seeks to help participants

- Understand key concepts of SDGs, the targets and indicators
- Gain familiarity with the indicator framework, statistical quality assurance framework (SQAF) and the role of statisticians in monitoring the indicators
- Identify data sources and gaps and challenges in SDG monitoring
- Understand the sampling designs commonly used to monitor SDG indicators and appreciate the role of surveys in measuring SDG indicators
- Learn new technologies for survey data collection, analysis and visualization
- Gain practical experience through presentations, group work and case studies

Intended participants: Academicians, scholars, employees of national statistical offices as well as government and non-government organizations, practitioners, students and postgraduates of SAARC member countries

Registration fee: USD 70 payable in advance by each selected participant

Funding: Travel support, accommodation, meals, workshop kit, lecture materials

How to apply: Send an email to the Director, ISRT at workshop@isrt.ac.bd with your CV and a covering letter describing how you would benefit from attending this workshop and whether travel support is required by August 31st 2019. Selected participants will be notified by September 15, 2019. For updates please refer to <https://www.isrt.ac.bd/workshop>.
